ITT Pure-Flo Introduces the Value Switch Package (VSP), Engineered for Cost Effectiveness, Simplicity and Flexibility.

October, 2005, Lancaster, PA: As a complement to the existing Pure-Flo® hygienic valve product line, ITT Pure-Flo recently announced the introduction of the Value Switch Package (VSP).

The VSP is ideal for applications requiring basic actuator indication. The VSP is offered with a complete range of mechanical switches and proximity sensors to meet the electrical and control system specifications of the pharmaceutical industry. Additionally, the housing and cover materials are FDA compliant.

The VSP maintains a small dimensional envelope for process piping installations where space is at a premium. It is a perfect compliment to both the Advantage® and Advantage® Piston Actuator (APA) lines of pneumatic actuation.

The VSP is available for actuator sizes 0.25" (DN 6), 0.50" (DN 15), 0.75" (DN 20), 1.00" (DN 25), 1.50" (DN 40), and 2.00" (DN 50).
